Achiever's Hive

IMPORTANT QUESTIONS
FOR
MA PSYCHOLOGY FIRST YEAR
PAPER 06 – MPC 006

Section A – Theory (10 Marks)

1. Partial and part correlation with the help of suitable examples +1
2. Normal distribution & its importance and characteristics and applications

   (This topic has been asked repeatedly in past 4-5 exams)
3. Parametric and non-parametric statistics and assumptions of parametric statistics +4

(Non-parametric is asked many times in both section A and B)

4. Point by serial correlation and phi coefficient with suitable examples +1
5. measures of central tendency and measures of dispersion +1
6. Steps in computation of regression
7. Steps in the calculations of Pearson‘s product +1 moment, correlation with the help of an example

Achiever's Hive

8. Organisation of data
9. Descriptive statistics +1
10. Inferential statistics
11. Standard error with numerical
12. Spearman’s rank order correlation

Section A – Numericals (10 Marks)

1. One way anova +8
2. SpearMan’s rho +1
3. Kendall’s tau +5
4. t- test +5
5. Pearson product moment correlation +1

Achiever's Hive

Section B –Theory (6 Marks)

1. Hypothesis testing and errors in hypothesis testing
2. Use of non-parametric test +1
3. Divergence in normality (NPC) +1 And characteristics of NPC +1
4. Levels of significance
5. Frequency distribution in terms of group and group data
6. Partial and part correlation
7. Point and interval estimation +1
8. Two way anova merit and demerits +1 +1
9. International effect +1
10. Differences between parametric and non-parametric statistics +1

Achiever's Hive

11. measures of central tendency and measures of dispersion
12. Biserial and tetrachoric correlation
13. Standard error & its importance and applications +1
14. Type 1 & type 2 errors
15. Skewness
16. Levels of measurement

Section B – Numericals (6 Marks)

1. Mann-Whitney U Test +9
2. Chi Square +9
