

Achiever's Hive

IMPORTANT QUESTIONS
FOR
MA PSYCHOLOGY FIRST YEAR
PAPER 05 – MPC 005

One question from research design (of any type) is most likely to come in long.

Reliability and Validity are v. imp for long

Grounded theory is repeated in long and has come for 4 times from 2019 to 2023

One question in long and two questions in short are most likely to come as diffrences between two topics on the same pace – such as points 6,7,8,15 and 28 etc (mentioned below)

1. Objective of research design +3 in long
2. Types of experimental research design +2 in long
3. Types of quasi experimental design
4. Reliability and methods of estimating reliability+2 in long

Achiever's Hive

5. Reliability and various methods of estimating reliability +2 in shorts
6. Differences between group and within group design
7. Differences between variables and construct
8. Difference between qualitative and quantitative research +3
9. Advantages and disadvantages of correlational design
10. Various data collection methods in survey research + 1 in long
11. Qualities of a good research
12. What is the correlational research design
13. Experimental research ,field research, and quasi research – difference between any two of them in long
14. Discourse analysis steps and approaches

Achiever's Hive

15. Validity and Differences between internal and external validity +4
16. Threats to external and internal validity+2 in long +2 in shorts
17. Types of validity +2 in short
18. Difficulties in formulating a good hypothesis +2
19. Ex post facto research and its characteristics +3
20. Goals and steps of grounded theory +4 in long
21. Steps in research process +1 long
22. Single factor research design
23. Ethnography as a research method
24. Assumptions and steps in ethnography
25. Methods of estimating reliability

Achiever's Hive

26. Variables and its types + 1in long
27. Methods of data collection in survey research+2 in short
28. Difference between-quasi experimental and experimental research design
29. Quasi experimental research advantages and disadvantages
30. Factorial design
